Database Systems

“The discovery process is crucial to making drug discovery faster, smarter, and secure. We are pleased to leverage AI Security prowesses”

Matt Shlosberg

Chief Operating Officer

Challenges

- ❗ Ensuring customer database confidentiality to prevent unauthorized access
- ❗ Avoiding business losses from failed HIPAA compliance and regulatory fines
- ❗ Gaining cloud asset visibility to prevent shadow IT and misconfigurations
- ❗ Preventing PII leakage and ensuring secure patient data handling

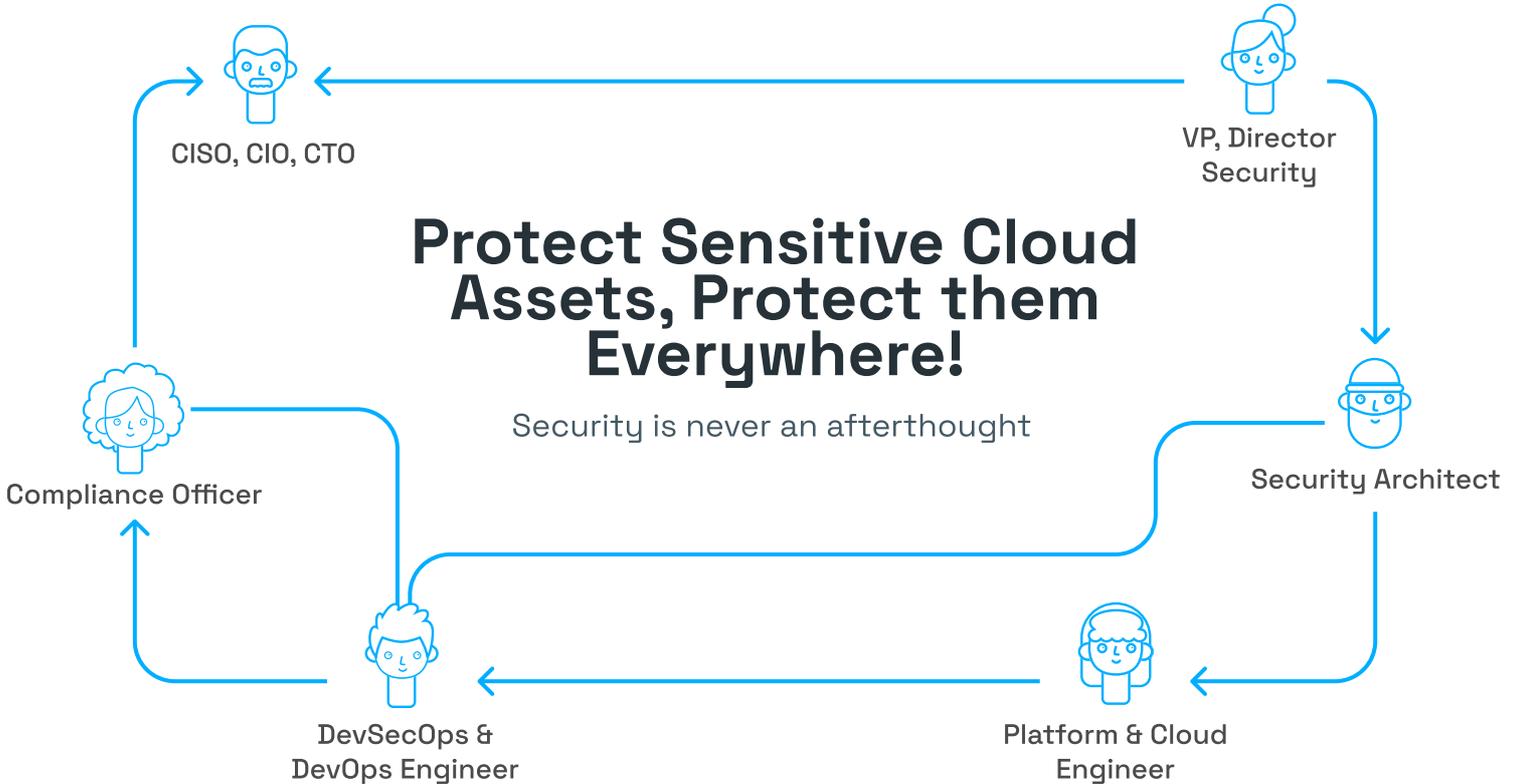

Solutions

- ✓ Automated vulnerability scanning for real-time threat detection
- ✓ Full CSPM asset visibility for continuous monitoring
- ✓ Baseline enforcement and compliance monitoring to reduce risks
- ✓ Integrated analyst ticketing to streamline incident response
- ✓ CI/CD security scans for secure deployments

Outcomes

- ✓ Achieved robust PII leakage prevention through data loss prevention (DLP) integration, **reducing breach risks by 85%**
- ✓ Enhanced patient data security with **checking for encryption and fine-grained access** controls, minimizing unauthorized access incidents
- ✓ Improved **HIPAA compliance** with automated auditing, policy enforcement, and real-time reporting, ensuring continuous adherence
- ✓ Reduced security **incident resolution time by 60%** through streamlined vulnerability management and ticketing processes
