

Buck.AI Picks AccuKnox as Cloud Security Solution

Buck.ai, an AI solutions leader for the trades industry, to enhance their cloud security and compliance using AccuKnox's CNAPP. Buck.ai will also join as a Design Partner for ModelKnox, AccuKnox's AI security solution. [Press Release](#)

AI Security by

Introducing AI/LLM Security with ModelKnox

ModelKnox stops AI security threats before they can impact your operations. Our next-generation security features protect your entire AI infrastructure while maintaining optimal performance and compliance. [Watch Video](#)

US DoD - Platform One & Tradewinds Marketplace AccuKnox Achieves Awardable Status

AccuKnox's inclusion in Platform One and Tradewinds highlights the platform's ability to address the security challenges of the DoD and federal agencies, solidifying its role as a trusted partner in safeguarding critical missions. [Press Release](#)

Is Your App Under Attack? Join the webinar with Checkmarx experts

Join us for a webinar on February 18, 2025, exploring the integration of AccuKnox and Checkmarx for shift-left security. Explore cloud-native application security with tools like SAST, DAST, and CSPM, for end-to-end compliance and multi-cloud support. [RSVP Now](#)

Simplified Kubernetes Security: Talos Linux + KubeArmor Integration

Explore how to deploy KubeArmor on Talos, enabling policy-driven application hardening, observability, and Zero Trust security practices. This technical paper discusses deployment, policy creation, telemetry observation, and inline mitigation to secure applications against modern threats. [Download Now](#)

KubeArmor Deep Dive: Securing Kubernetes with eBPF & LSM. This video covers use of Linux Security Modules (LSMs) for cluster security, policy enforcement, and observability. Learn to configure policies. [Watch Now](#)

AIDASH was looking for a Comprehensive Cloud Native Security platform that spans Application Security and Cloud Security. AccuKnox's very strong open-source project, KubeArmor, and Enterprise offering coupled with a strong roadmap of securing AI/LLM (Cloud Native Application Protection Platform) to achieve our Security and Compliance goals." - Rahul Saxena, Co-Founder, CTO

WotNot exposes 346K sensitive customer files. [Know More](#)

Customer Reviews

Get The Best Developer and Security ROI

Zero Trust Security Code to Cloud AppSec + CloudSec

Prevent attacks before they happen

SCHEDULE IT DEMO

- CNAPP Security: Code to Cloud, Build to Runtime Security
- Private Cloud Security: Redhat OpenShift, Openstack, Nutanix, VMware
- AI/LLM Security: Screens multi-cloud AI workload and LLM Security
- Edge/IoT Security: Securing Point of Sale (POS) & IoT devices
- 5G Security: Validation of 5G-SAN Configurations

Unique Solution in the Security Quadrant

AccuKnox delivers Agentless Zero Trust Security for Public (AWS, Azure, GCP) and Private (RedHat OpenShift, VMware Tanzu, Nutanix, Mirantis, Rafay) cloud platforms. AccuKnox CNAPP combines ASPM, CSPM, CWPP and KSPM to secure modern (Kubernetes) and traditional (Virtual Machine) workloads.

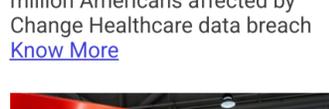

Case Studies

Check out AccuKnox's cloud security use cases in 5+ industry sectors that are leveraging CNAPP in production-grade enterprise security. [Learn More](#)
