Nanoprecise Partners with AccuKnox to Strengthen its Zero Trust Cloud Security and Compliance Posture

- Nanoprecise specializes in AI and IoT-based predictive maintenance and condition monitoring solutions, to help enterprises make data-driven decisions.
- They AccuKnox for its agentless architecture, rapid risk assessment capabilities, after comparison with other best-in-class incumbent Cloud Security vendors

Bringing the Industry best cloud security information

AccuKnox was a CNAPP Spotlight at the GITEX Dubai 2025

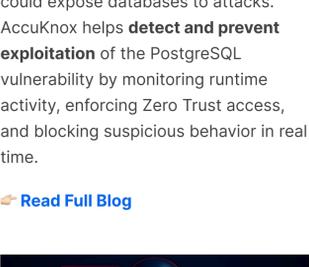

GITEX 2025 showcased our Zero Trust CNAPP, AI-driven threat detection, and runtime protection. Our team demonstrated live walkthrough for real security use cases. Our team also met it's existing customers, industry partners and shaped the product roadmap based on discussions with field experts.

Dubai World Trade Centre
October 13-17, 2025

CVE Defences

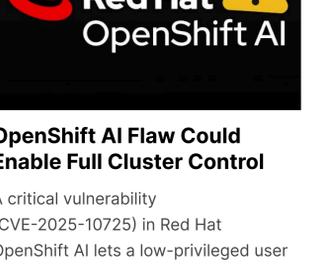

Read about recent cloud attacks and how to mitigate against critical CVEs

CVE-2024-1597 (PostgreSQL Vulnerability)

A SQL injection flaw in PostgreSQL could expose databases to attacks. AccuKnox helps detect and prevent exploitation of the PostgreSQL vulnerability by monitoring runtime activity, enforcing Zero Trust access, and blocking suspicious behavior in real time.

CVE-2022-2586 (Linux Kernel Vulnerability)

A use-after-free bug in nftables lets local users escalate privileges. Learn how AccuKnox runtime defense neutralizes the risk.

[Read Full Blog](#)

CVE-2025-1974 (NGINX CVE Vulnerabilities)

Critical flaws in NGINX can expose secrets and sensitive data through misconfigurations or vulnerable modules. AccuKnox protects in real time, enforcing Zero Trust access and monitoring runtime activity to prevent exploitation.

Industry News

Cyberworld headlines, stay informed

Hackers Use Verbose AI Code to Hide Malware

Cybercriminals are now using AI-generated verbose code to mask malware, making it harder to detect. This shows why AI-aware defenses are no longer optional.
