

# Stack Ranking

## Stack Ranking

AccuKnox offers Gen-AI/ML Powered unified Cloud Security platform with Inline Runtime Security. Unlike fragmented tools we deliver an integrated zero trust cloud security platform including CNAPP, CSPM, CWPP, ASPM, KIEM, CDR, KSPM with 30+ compliance frameworks support.

### Better

Provides real-time threat analysis, compliance insights, and automated risk mitigation.

### Faster

Provides real-time threat analysis, compliance insights, and automated risk mitigation.

### Cheaper

Provides real-time threat analysis, compliance insights, and automated risk mitigation.

### CNAPP Coverage

<p>Full stack CNAPP (CSPM, CWPP, CIEM, ASPM, KSPM, KIEM)</p>	<p>Full stack CNAPP incl. CIEM, ASPM</p>	<p>Full stack CNAPP</p>	<p>Focused on CWPP, CSPM</p>	<p>Focused on CWPP, limited CSPM</p>
--	--	-------------------------	------------------------------	--------------------------------------

### AISPM (AI Security Posture Management)

<p>LLM workload protection, AI pipeline visibility, prompt &amp; model abuse detection</p>	<p>Basic AI controls via compliance policy</p>	<p>Not focused</p>	<p>Not available</p>	<p>Not available</p>
--	--	--------------------	----------------------	----------------------

### CDR (Cloud Detection & Response)

<p>Native CDR with inline runtime detection &amp; response</p>	<p>Available via Prisma XDR integrations</p>	<p>Limited detection focus; not real-time</p>	<p>Runtime threat detection via Falco</p>	<p>Integrated with XDR for cloud detection</p>
--	--	---	---	--

### Runtime Security (K8s / Container)

<p>eBPF + KubeArmor (open source), inline enforcement</p>	<p>eBPF + Defenders, supports agent/agentless</p>	<p>No native runtime, partners for runtime</p>	<p>eBPF-based with Falco</p>	<p>Runtime detection, less granular for K8s</p>
---	---	--	------------------------------	---

### Inline Remediation / Admission Controller

<p>Native Admission Controller</p>	<p>Limited, mostly alert-based</p>	<p>Post-detection alerting, no admission control</p>	<p>Some enforcement via Sysdig Secure</p>	<p>Alerting only</p>
------------------------------------	------------------------------------	--	---	----------------------

### On-Prem / Air-Gapped CNAPP

 Supported natively	 Partial support; mostly cloud-first	 Not supported	 Requires specific configurations	 Not supported
------------------------	---	-------------------	--------------------------------------	-------------------

### Supply Chain / SDLC Security

 IaC, SAST, DAST, SCA, SBOM, CI/CD Sec (AskAda)	 IaC, Secrets, SAST, CI/CD	 IaC, Secrets, SBOM, CI/CD	 Limited to IaC	 Not core focus
--	-------------------------------	-------------------------------	--------------------	--------------------

### Zero Trust Policy Auto-Discovery

 Unique ZT policy generation engine	 Not available	 Not available	 Not available	 Not available
--	-------------------	-------------------	-------------------	-------------------

### Vulnerability Prioritization Engine

 AccuRisk™ contextual, risk-aware	 ExPRT.AI scoring	 Risk Graph and toxic combo detection	 Runtime-aware prioritization	 Falcon Spotlight scoring
--------------------------------------	----------------------	--	----------------------------------	------------------------------

### Compliance Frameworks Supported

 30+ frameworks supported	 30+	 20+	 20+	 15+
------------------------------	---------	---------	---------	---------

### Edge / IoT / 5G Workload Security

 Supported with telco-grade runtime	 Limited IoT, no 5G	 Not supported	 Not supported	 Not supported
--	------------------------	-------------------	-------------------	-------------------

### Open Source Driven Architecture

 KubeArmor, hardening profiles via CNCF	 Proprietary	 Proprietary	 Falco (CNCF project)	 Proprietary
--	-----------------	-----------------	-----------------------------	-----------------

### GenAI Security Chatbot (SecOps Copilot)

 AskAda	 None	 None	 None	 Falcon AI Assistant
------------	----------	----------	----------	-------------------------

#### Comprehensive Coverage

Compare cloud-native application protection platforms across all major security capabilities and features.

#### Real-time Analysis

Evaluate runtime security, detection capabilities, and response mechanisms across vendors.

#### Enterprise Ready

Assess compliance frameworks, zero trust capabilities, and enterprise security features.

## Summary Insights

LLM/AI workload security, CDR, inline runtime, telco/IoT support, open source

Broad CNAPP, deep integrations with Palo Alto ecosystem

Risk graph & posture correlation, agentless deployment

Runtime with Falco, strong DevOps integration

Strong runtime/XDR, limited posture or AI pipeline security
